

Sean Cunningham

(414) 791-7326 • scunningham77@proton.me • urtropedesigns.com

PROFESSIONAL SUMMARY

Senior front-end engineer with 12+ years building and owning large, user-facing web applications in TypeScript, JavaScript, HTML, and CSS. Leads front-end architecture decisions and owns features end-to-end – from scoping with product and design, through launch, to maintaining the code long-term. Professional depth in Angular and RxJS, with React experience from personal projects, including a published Ionic-React mobile app. Writes pragmatic, performant, testable code that holds up across browsers and devices, and shares knowledge with fellow engineers through code review.

RELEVANT SKILLS

- **Languages:** TypeScript, JavaScript, HTML, CSS
- **Frameworks & Tools:** Angular, RxJS, React, PrimeNG, Tailwind CSS, Node.js, Jest, Cypress
- **Performance & Quality:** Core Web Vitals optimization (Lighthouse/PageSpeed), image/font optimization, code splitting, responsive cross-browser UI, code review
- **Architecture & Ownership:** Led architecture decisions across multiple applications and major features, including reusable component systems; end-to-end ownership from scoping through production and long-term maintenance
- **Collaboration:** Close partnership with product managers, designers (Figma), and backend engineers to build polished, user-facing products
- **AI Tools:** GitHub Copilot Certified; agentic development with Claude Code across planning, implementation, testing, and review

PROFESSIONAL EXPERIENCE

Senior Front End Developer | Railroad19 | September 2021 – October 2026

- **Redesigned the front end of a high-volume order workflow** that, together with back-end automation, cut task completion time from 10+ minutes to 20 seconds across thousands of quarterly orders and earned recognition from multiple Senior VPs at NBCUniversal
- **Built responsive, data-dense dashboard interfaces** that turned complex ad-sales data into clear visualizations, enabling users to quickly identify and act on \$6.6M in mismarked orders
- **Designed a reusable, config-driven table-cell architecture** using Angular dynamic components, replacing duplicated row logic across the app's tables so new cell types could be added as requirements grew

Senior Software Developer | DCI Marketing | January 2016 – September 2021

- **Led frontend development** for the full redesign of subarudrive.com, a consumer-facing site, building responsive, cross-browser interfaces that integrated seamlessly with legacy backend systems
- **Improved Core Web Vitals by double digits** (Lighthouse/PageSpeed) through systematic image/font optimization and code splitting
- **Architected a snippet-based component system** that let non-technical writers and designers compose pages from pre-built pieces – interactive maps, image carousels, and more – rendered as live Angular components, removing engineering from the content-update loop
- **Spearheaded the move to an Angular single-page app** from server-rendered .NET MVC and jQuery templates, informally mentoring two other front-end developers through the transition

Software Developer | RF Technologies | August 2011 – January 2016

- **Led the team's adoption of AngularJS** from previous technologies, setting the direction for subsequent front-end work
- **Established development processes** using then-modern tooling such as Gulp and LESS
- **Worked on-site with customers** to configure and deploy asset-tracking and safety-alert systems, bringing real-world user feedback back to the engineering team

EDUCATION

- Master of Arts, Medieval Studies | Western Michigan University | 2011
- Bachelor of Arts, Latin and Medieval Studies; Minor in Linguistics | St. Olaf College | 2007

PROJECTS

- **Mobile App Development:** Launched hybrid mobile apps "[Barenziah Tracker](#)" (React/Ionic) and "[SelecQuest](#)" (Stencil), both built with Capacitor
- **Game Development:** Created games using Unity and C#, plus Goldulf Dustpunch, a browser and mobile game built with TypeScript, Phaser, and Capacitor
- **GitHub:** Regular contributions at github.com/scunningham777
